

BOLAN UNIVERSITY OF MEDICAL AND HEALTH SCIENCES, QUETTA

MBBS Year-I Modular Curriculum 2024

Bolan University of Medical and Health Sciences

Quetta

MBBS Year-1 Foundation Module-I Duration 6 Weeks

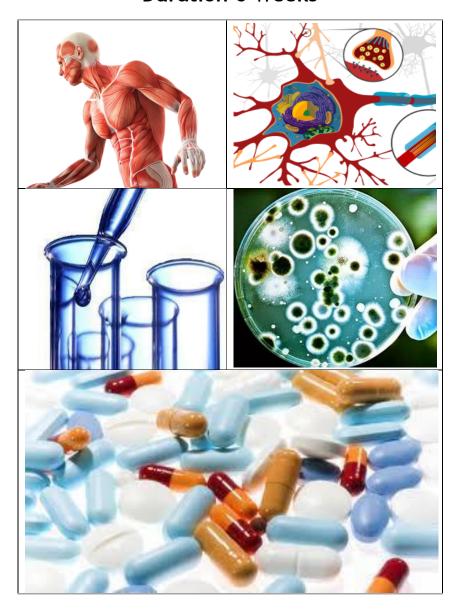

Table of Contents

General Learning Outcomes	4
Knowledge	4
Skills	4
Attitude	4
THEMES FOR FOUNDATION MODULE	5
THEME—I: Orientation	6
ANATOMY	6
PHYSIOLOGY	6
BIOCHEMISTRY	6
PATHOLOGY	6
PHARMACOLOGY	6
COMMUNITY MEDICINE	6
FORENSIC MEDICINE	6
MEDICAL EDUCATION	7
IT Skills	7
Library	7
THEME-II: CELL	8
ANATOMY	8
PHYSIOLOGY	8
BIOCHEMISTRY	9
PATHOLOGY	10
PHARMACOLOGY	10
LAB WORK	10
THEME–III: GROWTH & DEVELOPMENT OF HUMAN BODY	12
BIOCHEMISTRY	14
COMMUNITY MEDICINE	15
LAB WORK	15
THEME–IV: HUMAN BODY TISSUES, BONES & JOINTS	17
ANATOMY	17
HISTOLOGY	18

Physiology	18
Biochemistry	18
PATHOLOGY	18
FORENSIC MEDICINE	19
LAB WORK	19

General Learning Outcomes

By the end of this module the students would be able to;

Knowledge

- 1. Familiarize with the MBBS system-based curriculum.
- 2. Recognize the role of different disciplines in studying human body and its diseases.
- 3. Describe the structure, function, and biochemical composition of cell.
- 4. Describe the cell division, its types and genetic material along with its clinical correlation.
- 5. Describe the basic organization of human body.
- 6. Explain the maintenance of homeostatic mechanism.
- 7. Describe the various stages of pre-embryonic human development and correlate them with various malformations.
- 8. Describe the importance of buffer and PH system.
- 9. Describe various cellular adaptations during cell growth, differentiation, and cell injury.

Skills

- 1. Describe the basic laboratory techniques and use of microscope.
- 2. Follow the basic laboratory protocols.
- 3. Perform biochemical analysis of carbohydrates.

Attitude

- 1. Follow the basic laboratory protocols.
- 2. Participate in class and practical work efficiently.
- 3. Maintain discipline of the college.
- 4. Follow the norms of the college properly.
- 5. Communicate effectively in a team with colleagues and teachers.
- 6. Demonstrate professionalism and ethical values in dealing with patients, cadavers, colleagues, and teachers.
- 7. Communicate effectively in a team with colleagues and teachers.
- 8. Demonstrate the ability to reflect on the performance.

THEMES FOR FOUNDATION MODULE

SNO	Theme	Duration
1	Orientation	3days
2	Cell	1 week
3	Growth & Development of Human Body	2 weeks
4	Human Body tissues, bones & joints	2 weeks

Theme.1 Orientation (Week-1)

Introduction

This is a 3 days' activity consisting of a white coat ceremony on first day followed by orientation of students in groups where the students will visit each department in the college and hospital and a briefing about the structure and functions of each department will be given by the faculty so that the students are oriented in time.

THE/	THEME-I: Orientation			
SNO	Topic	Learning Outcomes		
ANA	ТОМҮ			
1	Anatomy and its	Define anatomy and its branches.		
	subbranches	Describe purpose of study of anatomy and its branches		
PHYS	SIOLOGY			
2	Physiology and its	Enumerate the branches of physiology		
	subbranches	Enamerate the branches of physiology		
BIOC	BIOCHEMISTRY			
	Introduction to	Define biochemistry.		
3	biochemistry and its	Discuss the role of biochemistry in medicine.		
	implication in medicine			
PATHOLOGY				
		Define pathology.		
	Introduction to	Enumerate the different branches of pathology.		
4	pathology and its	Identify different sampling and processing techniques in		
	implication in medicine	different branches of pathology.		

PHAF	RMACOLOGY	
	Introduction to	
5	pharmacology and its	Define pharmacology and role of pharmacology in medicine.
]	role in modern	Define the pharmacy dynamics and pharmacokinetics
	medicine	
COM	MUNITY MEDICINE	
	Introduction to	Describe Role of community medicine/public health in health
6	community Medicine	care system.
	and its implication	
FORE	ENSIC MEDICINE	
	Introduction to	Define Forensic Medicine, forensic pathology and state
	Forensic Medicine and	Medicine.
	Toxicology	Identify the Branches of Forensic Medicine.
7		Describe the History of Forensic Medicine.
'		Discuss the scope of Forensic Medicine.
		Identify the essential facilities for medico legal investigation.
		Define Medical Jurisprudence (not included for assessment in
		foundation module first year MBBS)
8	Pakistan Medical	Describe the structure and functions of Pakistan Medical
0	Commission, Consent.	Commission.
MEDI	CAL EDUCATION	
	Curriculum structure	Discuss the curriculum and modules.
	Teaching learning	Describe the use of study guides. (Not to be assessed)
9	strategies	Differentiate between various teaching & learning strategies.
		Enlist various assessment tools & assessment policy. (Not to
		be assessed).
IT Skills		
10	Importance of IT skills	Define IT and its importance
11	MS word skills	Prepare the assignment on MS word.

	PowerPoint skills	Prepare the presentation on PowerPoint.	
	Excel sheet	Use the excel sheet	
Libra	Library		
12	Literature search and	Literature search skills	
12	library resources		

Theme.2-Cell (week-2)

Introduction

These 7 days long theme consists of description of structural and functional organization of cell, its division and regulation of different cellular functions. This theme consists of lectures, Practicals, SGDs, DSLs and SDLs.

THEME-II: CELL			
SNO.	Topic	Learning Outcomes	
ANATO	MY		
	Cell structure and its	Describe the cell as a living unit of body.	
13	Organelles	Describe the structure of cell and its organelles.	
13		Describe the structure of cytoplasmic organelles of the cell &	
		correlate it with their functions.	
14	Nuclear structure &	Describe the structure of the nucleus, nucleolus &	
14	components	chromosome and their functions in cell integrity.	
15	Cell division	Explain the process of cell division.	
13	Mitosis	Describe mitotic cell division with its stages.	
		Explain the process of Meiosis.	
	Meiosis	Describe karyotyping.	
16		Explain the non-disjunction of chromosomes.	
		Correlate the process of non-disjunction with chromosomal	
		abnormalities	
PHYSIC	PHYSIOLOGY		
17	Cell membrane	Explain Intra cellular and extra cellular environment.	
1/	physiology	Correlate cytoplasmic organelles with their functions.	
18	Homeostasis	Define homeostasis.	

	1		
		Describe the Homeostatic mechanism of major functional	
		systems.	
		Describe the characteristics of control systems with examples	
		Define membrane potential.	
19	Membrane potential	Describe ionic conc. differences across cell membrane.	
13		Explain the Nernst equation.	
		Explain origin of normal resting membrane potential	
20	Movements of cell	Explain the amoeboid movement of cells.	
20		Describe the ciliary movements	
		Explain the role of voltage gated Na+ and K+ channels in	
21	Depolarization &	action potentials.	
21	Repolarization	Discuss the changes in conductance of Na and K channels with	
		changes in membrane potentials	
ВІОСНІ	BIOCHEMISTRY		
	Biochemical	Explain the Bio-chemical composition of cell organelles and	
	structure of cell	cytoplasm.	
22	Biochemical	Describe the chemical structure of mitochondrial membrane.	
22	structure of	Explain the biochemical importance of mitochondrial	
	Mitochondria	membrane.	
	Nuclear membrane	Describe Bio-chemical structure of nuclear membrane and its	
23		functions.	
		Define and explain nucleotides and nucleosides.	
	RNA & DNA	Describe the components of nucleotides.	
24		Describe the functions of Nucleotides.	
		Describe the types of nucleic acids.	
		Differentiate between RNA and DNA.	
25	Buffer	Define Buffer and its role in maintenance of body PH.	
1	1		

		Define colloidal state and Henderson Hasselbalch equation.
		Define adsorption and how it occurs.
		Explain ion exchange resin
	Cellular membrane	Explain membrane transport.
	transport	Discuss passive diffusion, active transport, and facilitated
26	mechanism	transport via a channel or carrier.
		Describe and evaluate the role of ion gradients, co
		transporters, and ATP in active transport mechanisms.
PATHO	LOGY	
		Describe the various causes of cell injury.
27	Cell injury	Describe the response of a normal cell to stimuli.
27		Describe the mechanisms of cell injury.
		Describe the different types of cellular adaptations.
PHARM	AACOLOGY	
	Routes of	
28	administration of	Enlist the route of administration of a drug.
	drugs	
29	Transmembrane	Explain how drugs are transported across cell membrane and
	drug transport	factors affecting it
	Receptor and	Enlist the types of drug receptors
	cellular basis	
30		
LAB W	ORK	1
31	The Microscope	Identify parts of microscope.
		Demonstrate operation of microscope.

		Describe the method of focusing slide at different
		magnifications.
		Follow the specified norms of lab work.
32	Lab Equipment	Introduction to lab techniques
32		Identify the equipment used in lab work
	PH and buffer	Define normal solution.
	solutions	Define standard solution.
33		Prepare 0.1N solution of NaOH.
		Prepare 0.1N solution of HCL.
		Measure the PH of given solution (practical).
I	I	

Theme.3-The human body development and body tissues (Week 3 & 4)

Introduction

This module consists of explanation of concepts of embryonic and fetal development. It also includes structure of human body tissues. Physiology and biochemistry include the mechanisms of cell divisions and enzymes. Introduction of Medical Education, PRIME and behavioral sciences are also included in this module. This module consists of lectures, Practicals, DSLs and SDL.

LEARNING OBJECTIVES:

SNO	Topic	Learning Outcome
	Introduction to	Describe the developmental stages.
34	Embryology	Describe the embryologic terminology.
		Explain significance of embryology.
		Describe the process of spermatogenesis.
	Spermato-Genesis	Differentiate between spermiogenesis and
35		spermatogenesis.
		Describe the morphological changes during maturation of
		gametes.
36	Oogenesis	Describe oogenesis and its correlation with meiosis.
30		Compare the male and female gametes.
	Transport Of Gametes	Explain the transport of gametes.
37		Describe the transport of sperms.
37		Describe the oocyte transport.
		Explain the maturation of sperms.
38	Female reproductive	Describe the ovarian cycle.
	cycle	Discuss the process of follicular development.

		Explain the process of ovulation.
		Correlate ovulation with the phases of menstrual cycle.
	Fertilization –Events	Define fertilization.
		Describe the process of fertilization.
39		Explain assisted reproductive technologies like In-vitro
		fertilization (IVF), assisted IVF and intra cytoplasmic sperm
		injection (ICSI).
	Fertilization –Clinical	Discuss the clinical correlation of the fertilization.
40	Correlates Cleavage &	Describe the process of cleavage of zygote.
40	Blastocyst Formation	Discuss the formation of blastocyst.
		Summarize the events of first week of development.
	Implantation & Its	Describe the process of implantation.
41	Abnormalities	Enumerate the sites of implantation.
41		Explain the clinical correlations of the implantation
		process.
	Amniotic cavity	Describe the formation of amniotic cavity.
42		Describe the development of embryonic disc.
42		Describe the development of umbilical vesicle.
		Explain the development of Chorionic sac.
	Events Of 2 nd Week of	Summarize the events of second week of development.
43	Development	Explain the clinical correlates of the second week of
		development.
44	Formation of Notocord	Explain the process of formation of Notocord
	Events of 3rd Week of	Describe the process of gastrulation.
45	Development	Explain the process of Neurulation.
45		Explain the development of somites.
		Describe the development of intra-embryonic coelom.

	Derivatives of germ	Describe briefly derivatives of germ layers.
46	layers	Ectoderm
		Mesoderm
		Endoderm
47	Further development of Trophoblast and Neurulation	Describe the process of development of Trophoblast and neurulation
48	Fetal membranes	Describe the formation of fetal membranes
49	4 th week: Folding of embryo	Describe the process and types of folding of embryo
50	Highlights of 4-8 weeks	Enlist the events occurring in 4-8 weeks of development
BIOCHE	MISTRY	
	Chemistry of Acids and Bases	Define acids, bases.
		Describe strong acids and weak acids.
		Describe strong bases and weak bases.
51		List different types and sources of acids and bases in our body.
		Describe the mechanism of their normal balance and biochemical importance
52	Importance of surface tension and viscosity in our body	Explain surface tension, viscosity, vapor pressure, normal boiling point and capillary action
53	Carbohydrates -I	Describe carbohydrates and give their Bio-chemical importance. Classify Carbohydrates

		Explain carbohydrate and its Bio-chemical structure.		
		Describe the different isomers of monosaccharides. e.g.		
		Galactose, mannose, fructose, dextrose.		
		Describe the role of dextrose in I/V infusion.		
		Describe the role of mannitol in cerebral edema.		
F 4	Carbohydrates -II	Describe the structure of disaccharides and		
54		oligosaccharides.		
		Relate the structure of polysaccharides with its clinical		
		importance.		
55	Carbohydrates -III	List the functions of carbohydrates in cell membrane,		
		energy provision and nutrition supply to different parts of		
		body.		
COMMU	NITY MEDICINE			
56	Determinants of	Define health.		
30	health	Describe the Determinants of Health		
	Disease causation	Describe Spectrum of Disease		
57		Explain Natural History of Disease		
37		Explain Theories of Disease Causation.		
		Differentiate between Disease Elimination and Eradication.		
58	Chain of infection	Describe reservoirs of infection & chain of infection		
59		Discuss /describe Levels of Prevention		
33	Levels of prevention			
LAB WC	LAB WORK			
60	Sterilization	Explain the process of sterilization.		
		Enumerate the different methods of sterilization.		
		Observe the process of autoclaving in the laboratory		
61	Oral temperature	Demonstrate how to take oral temperature		

62	Capillary Blood Sampling	Obtain capillary blood sample for hematological investigations through prick method. Identify the sites for obtaining blood sample with different methods and list the indications for their use.
63	Detection of Monosaccharide's Detection of Polysaccharides in a given Solution	Define Monosaccharide's Discuss structure and types. Perform the sequence of tests to identify the monosaccharides in a given solution. Define Polysaccharides. Discuss structures and types of Polysaccharides. Perform the sequence of tests to identify the polysaccharides in a given solution.
65	Detecting of Reducing and non- reducing Sugars, Replace all 3 with "Detection of CHO"	Define reducing sugars, types. Discuss structure and types of reducing sugars. Perform Benedicts test .

66	Tissue Preparation	Describe the process of tissue preparation for histological examination Perform H & E staining of tissue slides under supervision in the laboratory
67	Anatomical terms	Demonstrate anatomical terms for planes, position and movements. Demonstrate standard anatomical position and its application.

68	H& E staining	Perform H & E staining of tissue slides under supervision in the laboratory
69	Simple Epithelia	Identify and describe simple epithelia under M/S.
70	Stratified Epithelia	Identify and describe stratified epithelia under M/S.
71	Glands	Identify different types of glands under M/S.

THEME-IV: HUMAN BODY TISSUES, BONES & JOINTS (week 5 & 6)

Introduction:

THE	ME-IV: HUMAN BOD	Y TISSUES, BONES & JOINTS
SN0	Topic	Learning Outcome
ANAT	OMY	
72	Organization of human body	Describe the levels of organization of human body
73	Anatomical terms	Describe the anatomical terms for planes, position and movements
74	Classification of Bones	Describe the structure and function of bone Classify bones on the basis of length and shape. Identify the markings on bone
75	Cartilage	Describe cartilage Classify the types of cartilage Describe the types of cartilages
76	Introduction to Joints	Classify joints on the basis of structure. Describe the mechanism of movements of joint
77	Muscles	Describe various muscle types along with structure.
78	Skin / Integumentary system Skin (dermis & epidermis) Skin creases, Nails, Hairs, Glands (Sebaceous & sweat)	Discuss the anatomical structures of Skin / Integumentary system
79	Lymphatic system	Describe the lymphatic system. Explain the functions of lymphatic system Describe the organization of lymphatic system Explain the mechanisms for the movement of lymph in the body.
80	Nervous system Divisions (central & peripheral and somatic & autonomic)	Define the organization of nervous system Describe the divisions of nervous system Describe the formation of spinal nerve and concept of dermatome and myotome Describe the formation of nerve plexus.
81	Autonomic Nervous system Sympathetic. parasympathetic nervous system	Describe the organization of autonomic nervous system Differentiate between sympathetic and parasympathetic nervous system on the basis of structure.
82	Membranes: Mucous membranes, Serous membranes	Describe the structure of membranes of human body

	Faccia licamenta and	Describe the quetamy and significance of feeding
83	Fascia, ligaments and	Describe the anatomy and significance of fascia,
	raphe	ligaments and raphe.
0.4	Radiological anatomy	Identify various anatomical landmarks on radiography.
84		Describe commonly used radiographs. Describe various view used for obtaining radiographs.
		Describe various view used for obtaining radiographs.
HISTOL	.OGY	
	Basic Body tissue	
	Definition of tissue	
85	Epithelial tissue	Define tissue
	Connective tissue	Describe the basic tissues in human body
	Muscular tissue	
	Nervous tissue	
	Epithelial tissues	Classify epithelium
	Classification of	describe the general features of epithelium
86	epithelium	explain the specialized functions of different types of
	General characteristics	epithelial cells
	and Functions of	Describe the structure of main types of cell junctions
	epithelium	F. Parada and Taxas 20 ha Pa
	Clandular Enithalium	Enlist glandular epithelia
	Glandular Epithelium	Classify them on the basis of morphology, nature of secretion and mode of secretion
87		Differentiate between exocrine & endocrine glands on
		the basis of structure and function.
		the basis of structure and function.
	Epithelial Cell Surface	Describe the surface specialization of epithelia
88	Specialization	Correlate their structure, with their location and
		function
00	Structure & Function of	Describe the structure of basement membrane &
89	Basement Membrane	correlate it with its function.
	Connective tissue	Define connective tissue.
90		Classify connective tissues.
90		Explain the different types of Connective tissues
Physiol	logy	
-	Autonomic Nervous	Describe the functions of the autonomic nervous
	system	system.
91		Compare and contrast the functions of sympathetic and
		para sympathetic nervous system.
		Classify autonomic receptors.
Bioche	mistry	
	structure and function of	Describe the structure and function of GAGS and its
92	GAGS	clinical importance
PATHO	LOGY	
		Discuss the Process of necrosis
93	Necrosis	Explain the process of apoptosis
		Differentiate between apoptosis and necrosis

94	Inflammation	Describe acute inflammation Describe events of acute inflammation Describe chronic inflammation Differentiate between acute and chronic inflammation.		
FOREN	FORENSIC MEDICINE			
95	Death	Define death. Describe stages of death. Describe medico legal importance of stages of death.		
LAB W	ORK			
96	Tissue Processing	Describe the process of tissue processing for histopathological examination.		
97	Anatomical terms	Demonstrate anatomical terms for planes, position and movements. Demonstrate standard anatomical position and its application.		
98	H& E staining	Perform H & E staining of tissue slides under supervision in the laboratory		
99	Simple Epithelia	Identify and describe simple epithelia under M/S.		
100	Stratified Epithelia	Identify and describe stratified epithelia under M/S.		
101	Glands	Identify different types of glands under M/S.		
102	Smear preparation	Prepare a blood smear.
